

Global Consciousness Organizations

This is a list of organizations who are doing work in the field of global consciousness. While elevating individual and leader consciousness is essential to expanding the energetic field of global consciousness, the organizations selected for this list are focused on systemic transformation rather than a primary focus on individual transformation. At the same time, we recognize that individual transformation is the foundation of collective transformation.

The [Global Consciousness Institute](#) is engaged in a project called "Mapping the Terrain of Global Consciousness Organizations" with the goal of identifying those doing work in this domain and facilitating interconnections and collaboration. This project consists of creating a 3-dimensional online map using mapping software such as KUMU, as well as in-depth interviews with leaders of many of these organizations.

Potential users:

- Funders looking for fundable projects worth investing in.
- Organizations seeking funding.
- Organizations that are also interested in movement building who can include their insights, contacts, best practices, etc.
- Researchers interested in global consciousness, systems transformation, organizational transformation, levels of consciousness at individual and systems level, etc.
- Researchers who are writing case studies.
- People who are working on curriculum development for business schools, corporate universities, online programs, leadership development, wisdom schools, etc.
- Movement builders who are looking for others in their geographic region, profession, faith tradition, or other delineation who want to create online and/or face-to-face gatherings.
- Seekers who want to work for or volunteer at organizations who are more globally conscious.

Potential organizational categories:

Academic (traditional), Academic (non-traditional)
Foundation
Religious
Spiritual (but not affiliated with a particular religion)
For-profit, Non-profit
Research-focused
